

Rural by Design: Planning for Town and Country

For Americas suburbs, small cities, and rural areas, new challenges demand new solutions. Author Randall Arendt meets them in an entirely new edition of Rural by Design. With 80 percent new material, the second edition of this planning classic shifts the focus to infilling neighborhoods, strengthening town centers, and moving development closer to schools, shops, and jobs. New chapters cover form-based codes, visioning, sustainability, low-impact development, green infrastructure, and more, while 70 case studies show how these ideas play out in the real world. Readers -- rural or not -- will find practical advice about planning for the way we live now. It has been a decade since I read the first edition, and I was struck by how useful the information is to rural and urban alike. In many ways the title of the book is a misnomer, because this book is a great tool for new urbanists, small town enthusiasts and those that want to preserve and enhance the open space we all need. n Christopher Parker, Assistant City Manager: Director of Planning and Strategic Initiatives, City of Dover, NH The second edition of Rural by Design is worth the 20 years necessary for its update. Arendts latest work is thorough and well researched.. This is a must -have book for every planners library. The concepts are transferable and clear, and the rationale is directly on point and understandable to all audiences.Rick Bernhardt, FAICP, Executive Director, Metropolitan Nashville-Davidson County Planning DepartmentRandall Arendt has managed to take a great book and make it even better. This newest version has been expanded to make it even richer in content, including nearly doubling the number of case studies and graphics. It has also evolved to remain relevant to current planning philosophies.Philip Walker, AICP, Principal, The Walker Collaborative, Nashville, TN See all reviews in their

Hansen Family Farm

Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

Latest News....

Phil and Christie Hansen

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition

we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
