

Preserving the Ingenairii (The Ingenairii Series Book 6)

The Ingenairii Series concludes in Preserving the Ingenairii when Alec floats down the Giffey River, returning to the Dominion after his battle with Michians demon at Ravinia Bridge and John Marks Cave. He arrives in Goldenfields, ready to embrace his destiny as the next ruler of the Dominion, only to discover that all members of the ingenairii race, including his fiancée Bethany, have been struck down with an unidentifiable illness, leaving them all unconscious and wasting away in a coma-like state. Thus begins Alecs great adventure, a desperate journey that will take him from Oyster Bay to Stronghold, across the eastern plains and into the wilderness of the Pale Mountains in search of long-forgotten ancient ruins. John Mark reveals that Alec will have to travel into the lands of the lacertii, and seek their help, for only they can guide him to find the weapon he will need if he is to save the ingenairii - an ancient, holy talisman that resides in a place across the lacertii kingdom, where Michians invasion has created a deadly battle zone. And if Alec can gain the lacertiis trust, and then survive the challenges of the conflict zone, he will be armed and ready to take on his most difficult battle: a physical journey into the ingenairii dimension in order to fight a demon! Alec has faced rebellions, invasions, and deadly injuries, but how can he hope to beat a demon enhanced in the energy realm, especially when he must struggle to survive a daunting quest without calling upon his own powers?

Hansen Family Farm

Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

Latest News....

Phil and Christie Hansen

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
