

## RIDDLES CLASS 9F 2-10-0S (Locomotives in Detail)

The single largest class of new locomotive to be constructed after the Nationalization of Britain's railroads in 1948, the 251 representatives of the Riddles-designed Class 9F 2-10-0 were amongst the most powerful steam locomotives ever constructed in the United Kingdom. First introduced in 1954, these impressive locomotives were destined never to fulfill their true potential as, in 1955, the Modernization Plan foreshadowed the complete elimination of steam traction from Britain's railroads. Construction of the class continued until 1960, when No 92220 Evening Star became the last main line steam locomotive to be constructed for use by BR. By this date, however, it was clear that the class was destined to have a relatively short life and, by the final withdrawal of main line steam in August 1968, many of the class had been withdrawn after less than a decade in service. Designed primarily for heavy freight traffic, where they performed superbly on services such as the iron ore duties from Tyne Dock to Consett, the 9Fs were equally at home on passenger turns. Amongst the lines that were to see the class regularly hauling passenger trains was the ever-popular Somerset and Dorset line between Bournemouth and Bath. REVIEWS very well done.. all railroad historian as well as hobbyists should find it interesting...Internet Modeler 11/2007

Hansen Family Farm  
Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the "locavores", food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

Latest News....

Phil and Christie Hansen

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
