

## Castles and Landscapes (Archaeology of Medieval Europe)

Castles were among the most dominant features of the medieval landscape, and many remain impressive structures to the present day. This work looks at castles in a new light, using the theories and methods of landscape studies. Castles are examined not as an isolated phenomenon, but in relation to their surrounding human as well as physical areas. Taking a thematic approach, the study examines a broad range of evidence, archaeological, documentary and topographical, to assess the contribution of these structures on the evolution of the medieval landscape. The imprint of castles on the human landscape was powerful and often long-lived. As imposing icons of status and lordship, castles re-shaped the landscape in the minds of contemporaries, while as estate centres and manors they were closely connected with their surrounding hinterlands. The settlement landscape was also deeply affected by castle building as their powerful aristocratic owners fostered new towns and villages, while other communities were disrupted by their construction. The types of sites chosen for castles are also examined, as are the features that often accompanied them, including churches, mills, monasteries, deer parks, fishponds and gardens. Throughout, this book challenges many of our perceptions about medieval castles and presents some new avenues for future research.

Hansen Family Farm  
Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

Phil and Christie Hansen

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
