

# The Tripolye Culture giant-settlements in Ukraine: Formation, development and decline

The crucial role that the Ukrainian branch of the Tripolye culture played in shaping the historical formation of the Ukraine, and indeed that of Europe, is still not fully understood or appreciated. Although we are mostly aware of its finely-crafted and decorated pottery, along with the highly-discussed house architecture and huge settlements (known as giant-settlements), we often fail to connect the various dots in order to understand the different aspects of its development, from the very first eastward migrations, to the scission into two separate local groups (eastern and western Tripolye culture), the formation of the so-called giant-settlements, and finally to its inexorable decline after more than 2000 years of prosperous existence. This book attempts to bring together in English a variety of research traditions of Eastern and Western Europe, traditionally published in various languages and not readily accessible to all scholars, in the examination of the Ukrainian archaeological record. The volume has been organised so as to give the reader a clear image of the Tripolye culture in the Ukraine, with a special emphasis placed upon the development of the so-called giant-settlements. Chapters discuss the geographical and chronological context, highlighting the different facets of the culture that resulted in the formation of the giant-settlements; relative and absolute chronology of the many sub-groups identified; migration; aspects of material culture (pottery and clay figurines, flint artefacts); architecture (settlement layout, house typology and standardised internal structures); experimental work on the construction and destruction of houses and controversial use of fire; and the ultimate disappearance of this accomplished and very long-lived cultural group.

## Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
