

Defectives in the Land: Disability and Immigration in the Age of Eugenics

Immigration history has largely focused on the restriction of immigrants by race and ethnicity, overlooking disability as a crucial factor in the crafting of the image of the undesirable immigrant. *Defectives in the Land*, Douglas C. Baynton's groundbreaking new look at immigration and disability, aims to change this. In the late nineteenth and early twentieth centuries, Baynton explains, immigration restriction in the United States was primarily intended to keep people with disabilities known as defectives out of the country. The list of those included is long: the deaf, blind, epileptic, and mobility impaired; people with curved spines, hernias, flat or club feet, missing limbs, and short limbs; those unusually short or tall; people with intellectual or psychiatric disabilities; intersexuals; men of poor physique and men diagnosed with feminism. Not only were disabled individuals excluded, but particular races and nationalities were also identified as undesirable based on their supposed susceptibility to mental, moral, and physical defects. In this transformative book, Baynton argues that early immigration laws were a cohesive whole a decades-long effort to find an effective method of excluding people considered to be defective. This effort was one aspect of a national culture that was increasingly fixated on competition and efficiency, anxious about physical appearance and difference, and haunted by a fear of hereditary defect and the degeneration of the American race.

Hansen Family Farm

Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

Phil and Christie Hansen

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
