

European Slave Trading in the Indian Ocean, 1500–1850 (Indian Ocean Studies Series)

Allen offers important insights that are likely to inform the debate on the Indian Ocean slave trade for years. The volumes annotated tables alone speak to several years of painstaking research on a variety of sources a significant contribution that should find a place in the library of any scholar of the slave trade. *African Studies Quarterly* Between 1500 and 1850, European traders shipped hundreds of thousands of African, Indian, Malagasy, and Southeast Asian slaves to ports throughout the Indian Ocean world. The activities of the British, Dutch, French, and Portuguese traders who operated in the Indian Ocean demonstrate that European slave trading was not confined largely to the Atlantic but must now be viewed as a truly global phenomenon. European slave trading and abolitionism in the Indian Ocean also led to the development of an increasingly integrated movement of slave, convict, and indentured labor during the late eighteenth and early nineteenth centuries, the consequences of which resonated well into the twentieth century. Richard B. Allens magisterial work dramatically expands our understanding of the movement of free and forced labor around the world. Drawing upon extensive archival research and a thorough command of published scholarship, Allen challenges the modern tendency to view the Indian and Atlantic oceans as self-contained units of historical analysis and the attendant failure to understand the ways in which the Indian Ocean and Atlantic worlds have interacted with one another. In so doing, he offers tantalizing new insights into the origins and dynamics of global labor migration in the modern world.

Hansen Family Farm
Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to

grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
