

Federal Guidelines for Dam Safety

These guidelines represent the culmination of efforts, initiated by President Carter in April 1977, to review procedures and criteria used by Federal Agencies involved in the design, construction, operation, and regulation of dams and to prepare guidelines for management procedures to ensure dam safety. The guidelines are based on an intensive review of Agency practices conducted by the Departments and Agencies themselves, by an ad hoc interagency committee of the Federal Coordinating Council for Science, Engineering and Technology (FCCSET), and by an Independent Review Panel of recognized experts from the academic and private sectors. These reviews are summarized in two earlier reports: Improving Federal Dam Safety, a report of the FCCSET, November 1977, and Federal Dam Safety Report of the OSTP Independent Review Panel, December 1978. Publication of the guidelines marks the final step in the review process. However, the Departments and Agencies recognize that there must be a continuing Federal effort to improve dam safety. Federal dam safety remains a fundamental responsibility of each Federal employee in every Department and Agency involved and it is on their technical expertise and dedication that the safety of Federal dams rests. These guidelines recognize that underlying fact and support management efforts to discharge that responsibility effectively and efficiently. These guidelines apply to Federal practices for dams with a direct Federal interest and are not intended to supplant or otherwise conflict with State or local government responsibilities for safety of dams under their jurisdiction. Current Federal initiatives to assist States and others with non-Federal dam safety programs are being pursued under other authorities. The objective of both programs, however, is the same: to allow the people of this country to

enjoy the benefits of water resource development with the best assurance of dam safety possible.

Hansen Family Farm

Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

Phil and Christie Hansen

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition

we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
