

Forest Tribes of Orissa Vol. 2: The Kuttia Kondh

In the management of renewable resources, forests have undeniably a vital role, and today, as never before, their conservation is an urgency. In view of this dire necessity the series Man and Forest tries to highlight the relevance of indigenous knowledge of various South Asian tribal communities in the sustainable management of forests/local resources more specially against the growing challenges of economic development vis-a-vis environmental hazards and a rapidly declining resource base. A scientific inquiry into indigenous knowledge is an effort to discover/rediscover the tribals traditional modes of production and conservation. For them it is the only source to cope with the problems of modernity affecting their lives and precarious environments. Forest Tribes of Orissa: The Kuttia Kondh is the sixth monograph in the series Man and Forest and, after the publication of an account of the forest world of the Dongaria Kondh in 2002, the second volume to deal with an aboriginal tribe of Orissa. Being a tribal community in transition, the authors have tried to document and thus safeguard its local traditional knowledge of conservation, use and management of forests and natural resources. They give an account of how the Kuttia Kondh classify trees and other plants, hills, forests, crops and animals. Their subsistence economy, agricultural system, social organization, religious beliefs and other important socio-cultural aspects of forest life have been extensively treated. The lifestyle of this tribal community is finally reflected on the background of forest policy and the impact it has on their livelihood. The present book is, as most of the volumes in the series, the outcome of nearly ten years research venture involving an interdisciplinary, intercultural team of sociologists, ethnobotanists, social anthropologists and other social scientists.

Hansen Family Farm
Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
