

International Organizations and the Implementation of the Responsibility to Protect: The Humanitarian Crisis in Syria (Global Politics and the Responsibility to Protect)

This book seeks to understand the obligation of the international community to implement the principles of the Responsibility to Protect (R2P). With a focus on the humanitarian crisis in Syria, the volume examines what formal responsibility and actual capability international institutions have to protect and prevent civilians from systematic mass atrocities and presents an analysis of several prominent international organizations (IOs). Each chapter focuses on a specific organization and explores their formal responsibilities and how these pertain to the obligations of the R2P. Existing capabilities and actual abilities to address the challenges of R2P are analysed by looking at these issues before, during, and after the occurrence of the humanitarian crisis in Syria. With the UN not fully engaged in the Syrian conflict, the systematic human rights abuses have engendered greater attention on other organizations. This volume argues that if the UN Security Council's inactions result in an abdication of responsibilities under the UN Charter, there should not only be a discussion of how the UN must alter its approach, but also an examination of whether there are alternative R2P paths for other MNOs to take in the name of international peace and human security. This book will be of much interest to students of R2P, humanitarian intervention, international organisations, Middle Eastern politics and security studies.

Hansen Family Farm
Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
