

Institutionalizing Illness Narratives: Discourses on Fever and Care from Southern India

This book is an ethnographic work that uses a critical medical anthropology approach to examine the concept of fever care in the context of southern India. Through a study of fevers, the study provides a critical overview to medical practice itself, as it is said that the history of fevers is also the history of medicine. This association between fevers and medicine is as relevant today, as this in-depth study of fever care reveals. Acknowledging the central role of health institutions in creating and propagating notions about illness in society, the author examines fever care through a study of hospitals. The study examines various discourses on fevers prevalent in the southern state of Kerala, which influence policy and programmatic dimensions of the state health services system. Fever care implies those aspects related to provisioning and cost involved among public and private sector hospitals. A second and more important dimension of this book is a critique of the culture of biomedical practice, informed by the social constructivist framework and approaches in the field of science studies. Overall, the book studies the processes by which physical symptoms like fever are treated as epidemics to be controlled, and are therefore brought within a biomedical system, thereby opening up options for commercialization of care.

Hansen Family Farm Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
