

History of the Twenty-Sixth Engineers: Water Supply Regiment in the World War; September, 1917 March, 1919 (Classic Reprint)

Excerpt from History of the Twenty-Sixth Engineers: Water Supply Regiment in the World War; September, 1917 March, 1919 This is a story of Service; of a regiment of men who sought the Service, whose motto was Service, and who gave their best service no matter what the job. A majority of the men came from civil occupations which had more or less to do with water, and in France the regiment formed the nucleus of the Water Supply Service of the American Forces. Thus its members may well have a feeling of satisfaction that they had opportunity to render the service for which they were best fitted, even if they could not literally go over the top. Finding the right place in the complex whirling machinery of a war-time army is a difficult matter, not only for individual men but occasionally for whole regiments. Not so with the 26th Engineers, however, for hardly had enough men been enrolled to make two companies before the call came from France for water-supply troops. From then until the American forces reached the Rhine, the regiment and even single companies were literally torn to pieces in the efforts of regional and army commanders to secure the specialized services of water-supply troops. Although at the temporary sacrifice of regimental spirit, this dispersion gave greater opportunity for service, broadening the view of officers and men from the horizon of regiment or division to that of army, and even to that of the entire Expeditionary Forces. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page,

may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Hansen Family Farm

Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

Latest News....

Phil and Christie Hansen

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition

we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
