

Refugees and the Asylum Dilemma in the West (Issues in Policy History ; #2)

An examination of the historical background and contemporary significance of the asylum and refugee issue confronting Western governments that draws lessons for future policy-making. This is the first study of the asylum-refugee problems to examine not only the history of policies of receiving nations in the West but also some of the underlying causes of refugee movements. Past studies of the asylum problem have focused narrowly on the conditions in receiving countries and have failed to see the global interconnectedness of the refugee problem. The authors argue that resolving the asylum problem in the West requires policymakers to direct their attention toward the conditions outside the industrialized countries that cause mass movements of populations as well as toward the improvement of their own asylum procedures. The present increase in the number of asylum-seekers and refugees is neither a temporary phenomenon nor a random product of chance events. It is the predictable consequence of fundamental political, demographic, economic, and ecological crises occurring throughout the Third World and Eastern Europe. However, Western governments did not until relatively recently envisage a large-scale movement of the poor countries northward to Western Europe and North America. Actual migratory pressures from the South and perceived threats of exodus from the East have only served to reinforce a restrictive attitude toward asylum. The refugee problem has reached such a critical point that the very institution of asylum is being threatened. These articles address the underlying causes of the current crisis, assess present policies, and define the considerations necessary for future policy-making.

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

Phil and Christie Hansen

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
