

The British Palaeolithic: Human Societies at the Edge of the Pleistocene World (Routledge Archaeology of Northern Europe)

The British Palaeolithic provides the first academic synthesis of the entire British Palaeolithic, from the earliest occupation (currently understood to be around 980,000 years ago) to the end of the Ice Age. Landscape and ecology form the canvas for an explicitly interpretative approach aimed at understanding the how different hominin societies addressed the issues of life at the edge of the Pleistocene world. Commencing with a consideration of the earliest hominin settlement of Europe, the book goes on to examine the behavioural, cultural and adaptive repertoires of the first human occupants of Britain from an ecological perspective. These themes flow throughout the book as it explores subsequent occupational pulses across more than half a million years of Pleistocene prehistory, which saw *Homo heidelbergensis*, the Neanderthals and ultimately *Homo sapiens* walk these shores. The British Palaeolithic fills a major gap in teaching resources as well as in research by providing a current synthesis of the latest research on the period. This book represents the culmination of 40 years combined research in this area by two well known experts in the field, and is an important new text for students of British archaeology as well as for students and researchers of the continental Palaeolithic period.

Hansen Family Farm
Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

Latest News....

Phil and Christie Hansen

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
