

# The Face of the Ancient Orient: Near Eastern Civilization in Pre-Classical Times

A lucid, intelligent, and lively summation an appetizing and stimulating introduction to the study of mans early civilizations. ScienceThis fascinating, lively study praised by the American Historical Review as a valuable introduction, perhaps the best available in English, to the ancient Near Eastern civilizations is essential reading for history students and for anyone interested in the development of Western civilization. The author, who was director of the Center of Semitic Studies at the University of Rome, undertook the study in order to make sense of several enormously important discoveries from the mid-twentieth century including the discovery of Ugarit, a Syrian city that flourished for 4,000 years; the unearthing of Mari, an equally important city of ancient Mesopotamia; and the discovery of the Dead Sea Scrolls. Professor Moscati begins with a chapter on the Oriental Renaissance and goes on to examine the Sumerians, Babylonians, Assyrians, Egyptians, Hittites, Hurrians, Canaanites, Aramaeans, Israelites, and Persians, before offering, in the final chapter, a synthesis of Near Eastern accomplishments in politics, society, literature, and the arts. His conclusion is that the civilizations of the ancient Orient [were] a tremendous human experience without which another, subsequent civilization would not be conceivable. One of the great pleasures of this intriguing book is its delightful sampling of illustrative quotations from primary sources some from the Bible and many others (often with strikingly biblical intonations) from the little-known writings of Sumer, Egypt, Hurria, and the other great civilizations that prefigured Greece and Rome.

Hansen Family Farm  
Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
