

The Science of Knowing: J.G. Fichtes 1804 Lectures on the Wissenschaftslehre (SUNY Series in Contemporary Continental Philosophy)

Considered by some to be his most important text, this series of lectures given by Johann Gottlieb Fichte (1762-1814) at his home in Berlin in 1804 is widely regarded as the most perspicuous presentation of his fundamental philosophy. Now available in English, this translation provides in striking and original language Fichte's exploration of the transcendental foundations of experience and knowing in ways that go beyond Kant and Reinhold and charts a promising, novel pathway for German Idealism. Through a close examination of this work one can see that Fichte's thought is much more than a way station between Kant and Hegel, thus making the case for Fichte's independent philosophical importance. The text is divided into two parts: a doctrine of truth or reason, and a doctrine of appearance. A central feature of the text is its performative dimension. Philosophy, for Fichte, is something we enact rather than any discursively expressible object of awareness; a philosophical truth is not expressible as a set of propositions but is a spontaneous inwardly occurring realization. Therefore, he always regards the expression of philosophy in words as strategic, aiming to ignite philosophy's essentially inward process and to arouse the event of philosophical insight. The new translation contains a German-English glossary and an extensive introduction and notes by the translator.

Hansen Family Farm
Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the "locavores", food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
