

## To Conserve Unimpaired: The Evolution of the National Park Idea

When the national park system was first established in 1916, the goal to conserve unimpaired seemed straightforward. But Robert Keiter argues that parks have always served a variety of competing purposes, from wildlife protection and scientific discovery to tourism and commercial development. In this trenchant analysis, he explains how parks must be managed more effectively to meet increasing demands in the face of climate, environmental, and demographic changes. Taking a topical approach, Keiter traces the history of the national park idea from its inception to its uncertain future. Thematic chapters explore our changing conceptions of the parks as wilderness sanctuaries, playgrounds, educational facilities, and more. He also examines key controversies that have shaped the parks and our perception of them. Ultimately, Keiter demonstrates that parks cannot be treated as special islands, but must be managed as the critical cores of larger ecosystems. Only when the National Park Service works with surrounding areas can the parks meet critical habitat, large-scale connectivity, clean air and water needs, and also provide sanctuaries where people can experience nature. Today's mandate must remain to conserve unimpaired but Keiter shows how the national park idea can and must go much farther. Professionals, students, and scholars with an interest in environmental history, national parks, and federal land management, as well as scientists and managers working on adaptation to climate change should find the book useful and inspiring.

Hansen Family Farm  
Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every

year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

Latest News....

Phil and Christie Hansen

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
