

US Defence Strategy from Vietnam to Operation Iraqi Freedom: Military Innovation and the New American War of War, 1973-2003 (Strategy and History)

US Defence Strategy from Vietnam to Operation Iraqi Freedom examines the thirty-year transformation in American military thought and defence strategy that spanned from 1973 through 2003. During these three decades, new technology and operational practices helped form what observers dubbed a Revolution in Military Affairs in the 1990s and a New American Way of War in the 2000s. Robert R. Tomes tells for the first time the story of how innovative approaches to solving battlefield challenges gave rise to non-nuclear strategic strike, the quest to apply information technology to offset Soviet military advantages, and the rise of decisive operations in American military strategy. He details an innovation process that began in the shadow of Vietnam, matured in the 1980s as Pentagon planners sought an integrated nuclear-conventional deterrent, and culminated with battles fought during blinding sandstorms on the road to Baghdad in 2003. An important contribution to military innovation studies, the book also presents an innovation framework applicable to current defence transformation efforts. This book will be of much interest to students of strategic studies, US defence policy and US politics in general.

Hansen Family Farm

Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
