

US Special Forces and Counterinsurgency in Vietnam: Military Innovation and Institutional Failure, 1961-63 (Strategy and History)

This volume examines US Army Special Forces efforts to mobilize and train indigenous minorities in Vietnam. Christopher K. Ives shows how before the Second Indochina War, the Republic of Vietnam had begun to falter under the burden of an increasingly successful insurgency. The dominant American military culture could not conform to President Kennedys guidance to wage small wars, while President Diems provincial and military structures provided neither assistance nor security. The Green Berets developed and executed effective counterinsurgency tactics and operations with strategic implications while living, training, and finally fighting with the Montagnard peoples in the Central Highlands. Special Forces soldiers developed and executed what needed to be done to mobilize indigenous minorities, having assessed what needed to be known. Combining Clausewitz, business theory and strategic insight, this book provides an important starting point for thinking about how the US military should be approaching the problems of todays small wars. US Special Forces and Counterinsurgency in Vietnam will be of much interest to students of the Vietnam War, Special Forces operations, military innovation and strategic theory in general.

Hansen Family Farm

Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
