

What Should I Believe?: An Inquiry into the Nature, Grounds and Value of the Faiths of Science, Society, Morals and Religion

Approaching his subject from another angle, Dr. George Trumbull Ladd's *What Should I Believe?* is not so diverse from William James's *Varieties of Religious Experience*. It concedes the fact that there must be diverse kinds of faiths to fit the endless variety of human needs. It also asks of the individual that he shall have the will to believe, which includes a definite act of faith. Faith is in reality, as Newman expressed it, a complex assent—an affair of the mind, the cognitive powers, the heart, the emotional powers, and the will, the volitional powers. It comprises subjective assurance and objective evidence. Professor Ladd's book is an analytical study of the scientific values of belief. His style, like that of many philosophical writers, is difficult because he seldom lets his thought crystallize into sharp and definite statements. One has to thread carefully through his sentences to determine his meaning. This difficulty mars the pleasure otherwise to be obtained from the writer's stimulating and broad-minded treatment of a subject of great interest to every Christian soul. *The Christian Advocate*, Volume 91 [1916]

Hansen Family Farm

Japanese Black Trifele

We are happy to provide quality fresh fruits, vegetables, Grass-fed and Finished Beef, Naturally & Humanely raised Pork, Pastured Chickens, and Cage Free Eggs to Clackamas County sustainably on our small acreage.

We strive to provide vegetables that grow well in our climate ensuring the best tasting local food available. We prefer to grow old-fashioned and rare varieties of vegetables believing that they are the best to offer but do also grow a very select, few varieties of hybrids, but they are counted on one hand! Much of what we grow, we save the seed of every year and re-offer it to members of the Seed Savers Exchange.

We thank all of you, the “locavores”, food enthusiasts, market goers, and home chefs for making our goal of fresh, local, fruits and veggies sustainably a reality.

2015 is off to a great start! We are looking forward to what this year has to offer!

All our efforts are gearing up to get the growing season started...from ordering/starting/transplanting seeds, planning rotation crops for the fields, cleaning the greenhouses and field equipment, and clearing the fields! There is not a dull day here on the farm!

Planning for garden start varieties is in full swing also. This year we will be offering many of our favorite heirlooms, open-pollinated, and hybrid varieties that we have grown for the past 10+ years as well as many new-to-us varieties. We are diligent to not purchase, offer or grow GMO seeds or food.

Our mix of garden starts includes many different varieties of tomatoes, cucumbers, peppers, ground cherries, pumpkins, melons, flowers and other great things for your garden! Most, if not all, varieties are tried and true for our Pacific Northwest valley climate. Check out the Garden Start page for a printable list of varieties available. Or go directly to a specific list at our Tomato, Pepper, and Other garden start pages.

We grew over 100 heirloom/open-pollinated Pepper varieties and 125+ varieties of heirloom/open-pollinated Tomatoes in 2014! Not counting the numerous other garden necessities like heirloom flowers, cucumbers, summer and winter squash, herbs, and melons amongst other rare and hard to find vegetables! In 2015 we will continue with the tradition we've started and will be planting and growing almost all the varieties that have been started so that even if you don't buy a plant you have a chance to taste a range of different flavors!
